

Rolling Shutters Measuring Form

Print This Page or Download Printable PDF

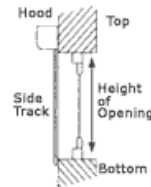

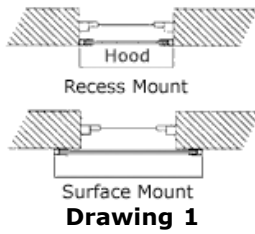

Some browsers allow you to scale the size of a web page before you print. Generally, you will find this under File>Page Setup in your browser's menu bar. Set the Scale to about 80% or so. Then, the form will print nicely on one page. Otherwise, I suggest you download the PDF file, as it will print nicely without doing a thing.

PDF files require Free Adobe Acrobat.

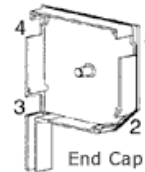

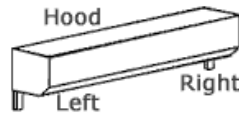

Red Arrows indicate where you need to measure the width and height of the opening.

Make sure you print out the Rolling Shutters **Measuring Instructions** to assist you.

Example of Surface Mount Installation
Drawing 2

Example of 45 degree end cap
Drawing 4

- **Measuring Instructions**
- Enter the information into our **automated pricing system**. Highlited numbered boxes are required to obtain a price.
- Only Questions 2, 3,4,7 and 9 are required to obtain an accurate price.
